1 Text

ConTeXt is a document preparation system for the TeX typesetting program. It offers programmable desktop publishing features and extensive facilities for automating most aspects of typesetting and desktop publishing, including numbering and cross-referencing (for example to equation 1), tables and figures, page layout, bibliographies, and much more.

It was originally written around 1990 by Hans Hagen. It could be an alternative or complement to LaTeX.

2 Maths

With ConTeXt we could write maths. Equations can be automatically numbered.

$$E = mc^2 \tag{1}$$

with

$$m = \frac{m_0}{\sqrt{1 - \frac{v^2}{c^2}}} \tag{2}$$
